PROJECTS

Personal Portfolio Website
Frontend Developer Portfolio
- Built using React.js and JavaScript for high-performance and scalable architecture.
- Developed responsive UI components, ensuring a seamless experience across desktop and mobile devices.
- Implemented optimised routing, fast page loading, and SEO-friendly structure.
- Used Antigravity as the primary code editor to enhance development workflow and productivity.
- Deployed the application using Vercel for continuous deployment and global performance optimisation.

Gridview Marketing Agency
Digital Marketing & Creative Agency Website
- Developed a modern and performance-focused website for a digital marketing agency with a clean and responsive UI.
- Showcased services like branding, social media marketing, web development, and business growth solutions through an engaging interface.
- Implemented smooth animations, interactive sections, and a mobile-first user experience for better engagement.

- Optimised the website for fast loading, scalability, and seamless performance across devices.
- Built using React.js, Tailwind CSS, Three.js, JavaScript, and Antigravity to create a scalable and visually engaging digital experience.

Origon
Premium Dessert Brand Website
- Developed a modern and responsive website for Origon, a premium dessert brand.
- Created a clean and visually engaging interface to showcase products like pistachio kunafa.
- Designed seamless navigation and optimised performance across all devices.
- Built the platform using React.js, JavaScript for scalability and high performance.
- Used Antigravity as the primary code editor to enhance development workflow and productivity.

Slog Fitness Center Website
Responsive Fitness & Training Website
- Built a modern, mobile-responsive fitness website with dynamic sections for programs, trainers, and membership plans.
- Designed visually appealing layouts with consistent branding and smooth navigation.
- Improved user engagement with interactive elements and structured content flow.
- Ensured fast performance and optimized loading for all devices.

Company Website
Service-Based IT Company Website
- Developed a professional and responsive website for a service-based IT company showcasing its core services, solutions, and business capabilities.
- Built clean, modular UI components using React.js to ensure smooth navigation and a polished user experience.
- Designed sections for services, industries, contact forms, and company information to improve lead generation and customer engagement.
- Ensured mobile-first design, optimized loading speed, and consistent branding across all pages.
- Deployed on Firebase Hosting for reliable performance, secure access, and fast global delivery.

Designer Portfolio
Personal Portfolio Website for Designer
- Developed a clean and visually engaging portfolio website for showcasing design projects.
- Implemented smooth animations, transitions, and interactive layouts using React and CSS.
- Focused on a minimal aesthetic to keep the user's attention on the showcased work.
- Ensured the website is responsive and performs well on all screen sizes.
